

electronic dwg groundplan and section drawings  
are available upon request

- Fire code states that scenery must stay 4' from DS concrete seating rise.
  - If using cyc and strip lights, leave 3' clearance between cyc and set for genie.
  - There is no offstage space. "Offstage" needs to be created with masking.
  - Masking is adjustable with the exception of the permanent travelers.
  - The traveler tracks can not be moved. They are located at 1' - 8" and 16' - 7" from the US brick wall.
  - There is a general 16' height restriction, with exceptions that can be discussed.
- Note that there is a large speaker cluster center stage behind pipe B that hangs down approx. 4' from grid.
